PROFILE

Final-year BSc CSIT student with internship experience across QA, full stack development and AI/ML. I build with the MERN and PERN stacks and Django, and test web apps with Playwright, Postman, OWASP ZAP and k6. I like finding the bugs that matter, such as a cross-branch data access flaw I traced and fixed on a multi-tenant SaaS platform.

SKILLS

Full-stack	React.js, Next.js, MERN, PERN, Django, PostgreSQL, REST APIs, HTML5/CSS3, Tailwind
Languages	JavaScript, Java, C/C++, Python (basic)
QA & Security	Playwright, Postman, OWASP ZAP, k6 (load testing), manual QA (test cases, bug reports)
Design & Tools	Figma (UI/UX design and prototyping), Git, GitHub

EXPERIENCE

QA and Frontend Intern

Completed 2026

Aankhijhyal Technologies Pvt. Ltd. | Pokhara, Nepal

- Tested and fixed bugs on Vyam, a multi-tenant gym SaaS ERP platform, and built responsive frontend features.
- Ran authorized load and security testing on company and client web apps using k6, Postman and OWASP ZAP.

AI/ML Intern

Completed 2025

Aakar eSolutions | Ranipauwa, Pokhara

- Applied Python and fundamental machine learning techniques to develop and evaluate AI/ML solutions.
- Tested and integrated AI-powered applications, evaluating model outputs for accuracy, consistency, and reliability.

Senior Test Center Administrator

2025

Prometric Testing and Assessment Solutions | Ranipauwa, Pokhara

- Ran daily test-center operations and resolved technical issues with testing software and hardware.

PROJECTS

Vyam: Multi-tenant Gym SaaS ERP

Internship project

Next.js 14, Fastify, PostgreSQL, Prisma, Tailwind

- Found and fixed a critical authorization flaw where branch-scoped staff could see other branches' member data.
- Fixed member status not auto-expiring by adding a scheduled node-cron job.
- Audited the UI/UX over multiple cycles and documented broken flows and branding issues for the project manager.

Vyapar Margdarshan: Expense Tracking & Advisory System

Final Year Project

React.js, Django, PostgreSQL, REST API

- Built an expense tracker for SMEs with a rule-based financial advisory engine and an analytics dashboard.
- Implemented role-based access control (Admin, Staff, Owner) with secure authentication and REST APIs.

WovenWay: Online Hemp Clothing Store

Minor Project

React.js, Django, PostgreSQL, REST API

- Built an e-commerce store with an analytics dashboard and role-based access for Admin, Customer and Owner.

Job Application Tracker

Personal project

MERN Stack with Typescript

- Web app to log job and internship applications and track their status.

EDUCATION

BSc. Computer Science and Information Technology (CSIT)

Final year

Soch College of IT, Tribhuvan University | Pokhara, Nepal

Coursework: Database Management Systems, Software Project Management (Agile), Web Technologies, AI

+2 in Science

Janapriya Multiple College | Pokhara, Nepal

LANGUAGES

English, Nepali
